FF25003

Hog Laser Designator

SPECIFICATIONS

Laser wavelength (nm)	532
Laser power output (mW)	<5
Visibility-day (yd/m)	50 / 46
Visibility-night (yd/m)	600 / 550
Battery type	CR123A
Battery life (hours)	5
Operating temp (°F)	32 to 122
Dimensions, (in/mm)	5.75 x 1.81 x 2.25 / 147 x 46 x 57
Weight (oz)	9.6

About

The Firefield Hog Laser Designator is perfect for precision aiming and illumination to light up and zero-in on your target. Match the size of hogs or other targets at various distances with its focusable beam, which allows users to easily adjust from spot to flood light. This Firefield laser sight offers users endless options, allowing interchangeable push-button or pressure pad operation. It also features three different reticle patterns, including a center-mass reticle for use with shotguns, allowing adjustments to match anyone's personal shooting preferences. The green laser is visible to the naked eye up to 50 yards during the day and 600 yards at night, with a dot size ranging from 2.5 to 175 inches. The Firefield Hog Laser Designator has a matte black finish and is constructed of aircraft grade aluminum with a weatherproof rating of IPX6. This Firefield unit is designed to be shockproof and features a click-adjustable windage and elevation mount.

FEATURES
