VENOM®

5-25x56 FFP RIFLESCOPE

ELEVATOR PITCH:

Take the first step into long-range shooting with an optic that helps you go the distance with a ton of shooter-friendly features. Featuring a 5-25x magnification range built into a 34mm tube for a massive amount of turret travel, the Venom® also includes our RevStop™ Zero System for a fast, easy, reliable return to zero. The First Focal Plane EBR-7C reticle gives you accurate holds at any magnification, and an included throw lever allows for fast transitions between magnifications. It's the quickest way to get your rifle out to 1,000 yards and beyond at a price that lets you go deep for less.

WHY DID WE MAKE THIS SCOPE?

To provide a long-range riflescope that offers even more than the Diamondback® Tactical FFP models. With long-range shooting sports on the rise, we wanted to create the perfect long-range shooting package for those just starting in the sport. We also wanted to make a scope that had many of the same features as the Strike Eagle® 5-25x56 --including an FFP reticle, 34mm tube, high magnification, and exposed turrets--at a more affordable price. This scope offers all the adjustment needed to dial those long-range shots.

WHAT IS NEW TO THIS OPTIC?

The Venom® 5-25x56 FFP riflescope is a new optic for Vortex®. The Venom® has our new, patented RevStop™ Zero System, and our EBR-7C reticle in an entry-level, long-range scope, which has traditionally only been in our Razor®, Strike Eagle® and Viper® PST™ lines, and a 34mm tube to provide the adjustment range necessary for effective long-range shooting.

WHAT ARE THE TOP USES FOR THIS PRODUCT?

Long-range and competition shooting.
