ABOUT

The 12 Survivors GeoPath Hiking Staff is a modern take on the traditional walking stick. Its rugged construction and sleek, practical design appeals to both the avid outdoorsman hiking a treacherous trail, or the everyday walker looking for added support and protection.

For hiking excursions in regions with challenging terrain, the 12 Survivors GeoPath is essential for added stability and covering ground more quickly. For both climbing and descending, this light-weight, durable hiking staff features a twist-locking mechanism for length adjustment, an anti-shock mechanism with interior springs, a no-slip custom foam grip for added comfort and safety, and a padded wrist loop that provides reliable on-trail performance.

Our GeoPath Hiking Staff also features a trekking basket for additional support, a durable carbide tip and snow basket for handling rocky and icy terrain with confidence.
