

Always Better®

Lightweight

Medical

The Trauma Kit NOW! - SMALL is a medical kit that holds all the necessary full-size lifesaving med supplies in the smallest footprint possible. Designed to hold all the lifesaving components of an issue IFAK kit following the MARCH protocol it has space for Massive bleeding, Airway, Respiratory, Circulation and Hypothermia treatment components.

The TKN! - SMALL medical pouch has two parts: the SHINGLE, which can be removed instantly by pulling up on the BLIP equipped handle, and the outer POUCH which attaches with the Helium Whisper Attachment System. This design allows for high-speed access to the inner contents while ensuring the pouch stays secure on your gear when not being used. Unlike other tactical medical kits on the market, you don't have to choose between speed of access versus security of your medical gear.

Weight

Part # HW-TKN-SM-EMPTY

Size

Features
