

PARTS ZEROED® ADJUSTABLE GAS BLOCK

If you're looking to shoot suppressed or simply fine tune your AR to your preferred ammo, the CMMG ZEROED Adjustable Gas Block gives you the freedom to dial in the gas system exactly to your liking.

A forward facing 20-position adjustment screw lets you find the sweet spot, avoiding an over gassed firearm that beats itself up or one that doesn't have enough gas to even cycle.

The sacrificial carbon chamber reduces fouling and helps prevent lockup while the user serviceable design allows for deep cleaning and parts replacement.

Gas blocks include a 6 inch 3/32 hex wrench to adjust gas settings.

FEATURES

- 20 POSITION GAS ADJUSTMENT SETTINGS
- TACTILE DETENT FRONT ADJUSTER
- SACRIFICIAL CARBON CHAMBER
- USER SERVICEABLE
- LOW PROFILE DESIGN
- NITRIDE FINISH
- INCLUDES ADJUSTMENT HEX KEY
