

Features

Low Profile

Delta Wing's unique and patent pending vertical fold is designed to provide maximum concealment and comfort while efficiently securing your weapon.

Level 1 Retention

Delta Wing grabs the weapon in two positions – the trigger guard and ejection port, allowing for solid Level 1 Retention, while providing for a fast and intuitive draw.

Audible Lock

2-point contact and extra thick and durable material provide an audible “click” to inform the user that the weapon is securely holstered.

Adjustable Retention

Employs an easy to use tension screw to provide the flexibility to adjust the tension on the weapon to accommodate for user preference and environment.

Affordable

Delta Wing's simple one-piece construction allows for an affordable, pragmatic design available to users regardless of budget.

Easy Assembly*

OWB Delta Wing comes assembled with a mounted paddle. Switching to a belt loop requires only a minute and a Philips head screwdriver. Additional spacers can easily be included with the same screwdriver. Longer screws are included for use with spacers.

***IWB Delta Wing** requires no assembly.

Sleek in design and engineered for split-second draw, the low profile Delta Wing holster is exceptionally lightweight and highly effective in easily securing and deploying your weapon. With its patent pending design, Delta Wing provides a sleek new look, Level 1 retention with a minimalist application, and a fast, forgiving draw.
