

ANNOUNCED: Q1 2018

NATRIX - COPPER
7006CU

a KERSHAW ORIGINALS design

D2 blade steel and genuine copper handles make this Natrix a standout. Based on the award-winning ZT 0777, the copper Natrix is a smaller knife. But because copper is denser than steel, it's a smaller knife with a pleasing heft—and a lot of style. You'll especially like the look once the handles have earned some patina.

ACTUAL SIZE

A large image of the Kershaw Natrix Copper knife. The knife is shown in two views: a full-length view on the left and a pocketclip view on the right. The blade is silver with a stonewashed finish and has the 'kershaw' logo on it. The handle is copper with a textured finish and has a flipper on the back. The pocketclip is silver and reversible.
