

MEPRO CABS

Co-Witness Adjustable Back-up Sights

Redundancy can be a good thing—especially if your red-dot optic goes down. The Mepro CABS gives you the ability to stay in the fight if and when that happens.

Flip the all-metal sights up when you need them. Fold them down when you don't. Designed for 100% true co-witness. The Mepro CABS ensures seamless target transition and absolute reliability.

Made in the U.S.A., it features a dual-aperture rear sight and a tritium-enhanced front sight, providing fast, accurate target acquisition in any light condition—day or night, 24/7.

Designed and built to perform under pressure, it's the assurance every shooter needs and the reliability every professional demands. Always On. Always Ready.

PROVEN ADVANTAGES

- **Co-Witness Ready:** Perfect alignment with 1.5" red dot optics
- **Built to Last:** Heavy-duty metal construction for maximum durability
- **Ready Instantly:** Flip-up design deploys fast, stays low-profile when stowed
- **Glows in the Dark:** Tritium front sight for 24/7 visibility, no batteries required
- **Fast. Flexible. Accurate:** Dual-aperture rear sight for versatile use
- **Made in the USA:** Precision-crafted domestically for superior fit and finish
