

# NIGHTFORCE

## Reticle MOA-C™

Available in:

NX6™ 3-18x50mm F1  
NX6™ 5-30x56mm F1  
NX6™ 6-36x56mm F1

### Applications:

- Competition
- Extreme Long Range (ELR)
- Hunting

### Features:

- Floating center dot for refined aiming
- Illumination for low light/ twilight conditions
- Clearly marked subtensions for easy and fast holds

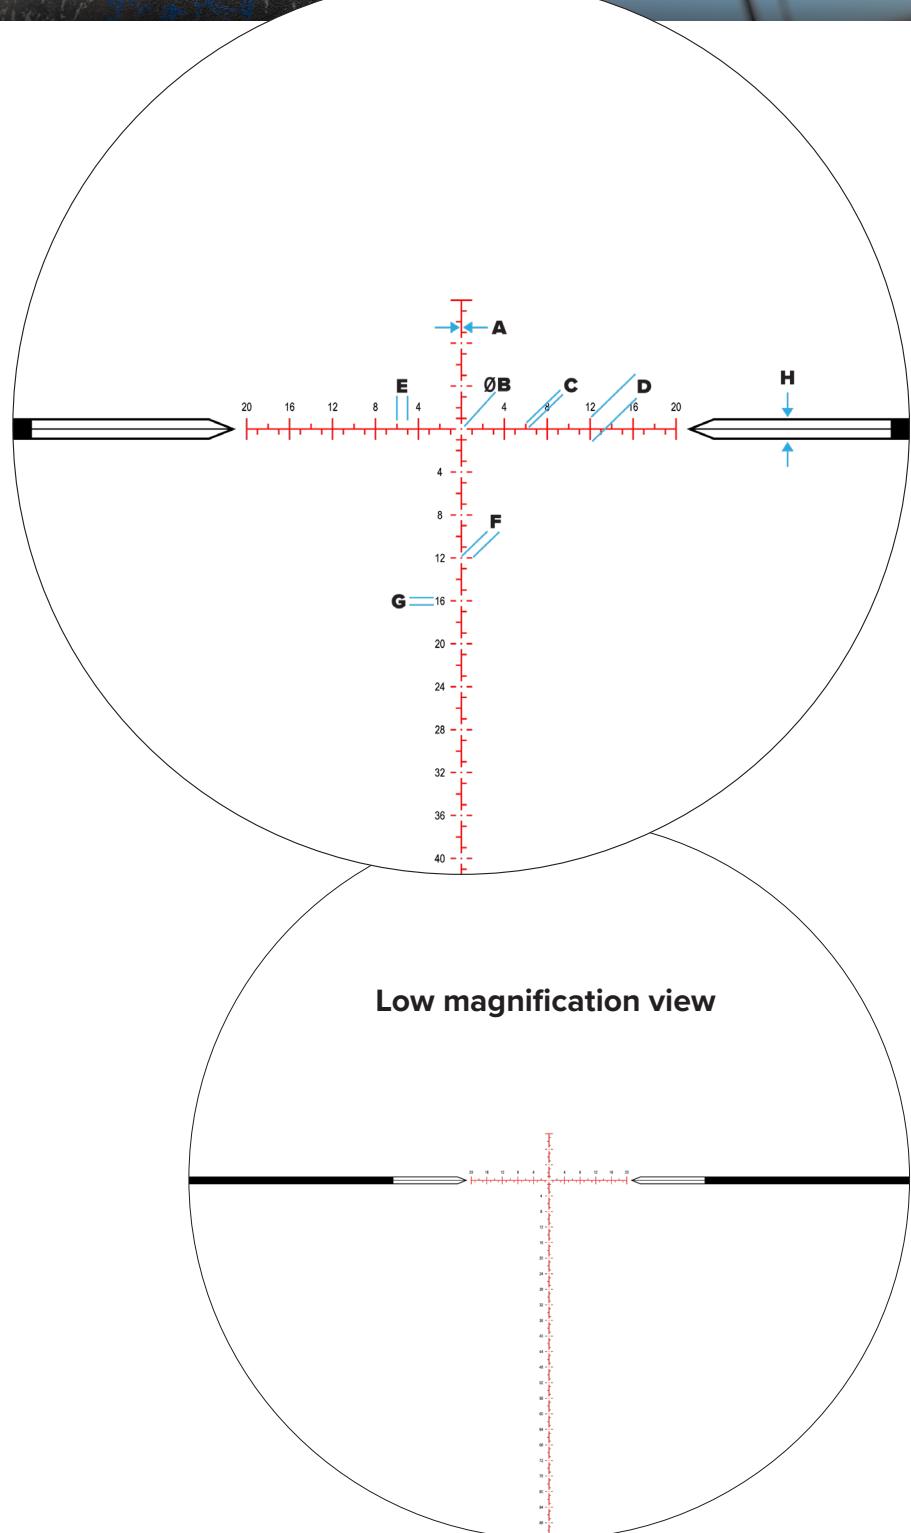

# Reticle

## MOA-C

The MOA-C™ reticle adapts the proven Mil-C reticle to minute of angle, providing first focal plane shooters a clear field of view without sacrificing the ability to hold. The floating center dot provides a refined aiming point and still allows an unobstructed view of the target. Consistent and easily visible numbering is designed for accurate holds and speed. Thick bars outside the main stadia lines help direct the shooter's eye to the center when fast shots are required. This reticle is designed for precision shooting in the field or on the range.
