METEOR NEW

Are you passionate about climbing, mountaineering, or ski touring? The METEOR helmet offers efficient protection for these three activities! Lightweight, compact and with excellent ventilation, it's comfortable in any season. The shape provides greater coverage for enhanced head protection and was specifically designed to be worn with ski goggles. Additionally, METEOR is the first CE certified helmet for ski touring (please note this helmet does not meet the requirements of the EN 1077 standard for alpine skiing helmets).

The low-profile design of the helmet is achieved using In-Mold construction with an expanded polystyrene (EPS) foam liner injected inside a lightweight polycarbonate shell.

Designed for optimal protection against side, front and rear impacts.

Rear elastic band is compatible with ski goggle headbands.

Short Description Lightweight helmet with enhanced protection for climbing, mountaineering and ski touring

Selling Points

- Lightweight, low-profile, ventilated helmet:
 - size S/M at only 225 g and size M/L at 240 g
 - low-profile design of the helmet achieved using In-Mold construction with an expanded polystyrene (EPS) foam liner injected inside a lightweight polycarbonate shell
