PIRANA CLUB

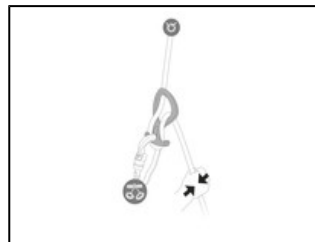

PIRANA CLUB is an adjustable friction descender. Easy to use and install, it's ideal for learning how to rappel in a canyon. It has three rope installation options to select the degree of friction before initiating a descent. It works well when used right-handed or left-handed. The plastic ring provides appropriate connector positioning and facilitates rope installation with the device remaining connected to the harness, limiting the risk of dropping it.

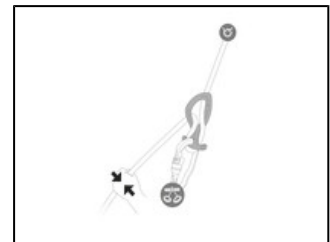

Plastic ring keeps the connector positioned properly to facilitate rope installation while the device is connected to the harness and limits the risk of dropping the device.

Three rope installation options to select the degree of friction before initiating a descent.

Sleek design to make instructions and visual inspections easier for the guide.

Possible to set up for right-handed or left-handed use.

Short Description Adjustable friction descender for canyoning

Selling Points
