

New! "Z Series" Dies

The Redding "Z Series" Dies utilize Larger, Stronger more Robust 1" die bodies. Our testing has proven that many modern high performing cartridge designs of today severely tax the capabilities of traditional 7/8" reloading dies. The increased strength of the 1" die bodies greatly reduce sizing effort and consistently provide better size control of the cartridge case.

... Size Matters.

Our new "Z Series" Die Family utilizes Larger, Stronger more Robust 1" die bodies.

Extensive lab testing has shown that the increased strength and rigidity of the new "Z Series" Dies provides significantly reduced sizing effort as well as more consistent sized case dimensions.

In short, it is all about the strength of material, the stresses induced and the deformation that occurs in the die itself.
