

# HOLSTERS

## DUTY GEAR

The 6390RDSO, 6354RDSO, and 6384RDSO holsters are designed for firearms with red dot sights. Its Automatic Locking System (ALS) secures the firearm. Unlike Safariland's RDS series, the RDSO has an open pocket that protects the optic and does not use a flip-up dust cover.

Safariland® cannot guarantee that RDS holsters will be compatible with non-factory (Glock MOS, M&P CORE, etc.) mounted red dots. Numerous variables, including placement of the RDS on the slide, use of dovetails, can affect the fit.

## RDSO (OUTSIDE THE WAISTBAND) OWB MODEL

### FEATURES\_
