

SCARPA SKI SIZING CHART

All SCARPA ski boots use Mondo sizing.

SCARPA ski boots break on the half size, this means that a half size shares the same shell length as the whole size above it but the liners are lasted for each 1/2 size. *For example, a 25.5 and 26.0 are the same shell size but the respective liners come pre-molded to the half size.*

Some skiers may want to downsize up to 1 full Mondo size, depending upon personal preference.
