Sightmark Core TX riflescopes use fully multi-coated optics to provide optimal light transmission in a variety of conditions. Etched glass reticles, in red or green, are illuminated to deliver optimal shot placement and are durable to withstand years of shooting. The Core TX riflescopes feature exposed, lockable turrets which help maintain a consistent zero. Turrets are quick and easy to adjust to compensate for bullet drop and windage on the fly. The Core TX 4-16x44MR Marksman is housed in a durable 30mm tube, built from aircraft grade aluminum and features a side focus adjustment for parallax removal. The Marksman Reticle (MR) is designed for long range shooting. Its MOA scale allows for ranging targets and features holdovers for bullet drop and wind.
