The **Sightmark Mini Shot Reflex Sight** is the most compact, lightweight reflex sight in the Sightmark reflex sight line. Its compact size improves the shooter's field of view of the surrounding environment. Featuring two brightness settings, double-paned glass and a green reticle, the Sightmark Mini Shot is designed to maintain peripheral vision and depth perception, allowing the user to keep both eyes open during use.

The Mini Shot also features a top-mounted, low-profile on/off switch for easy activation for right and left handed shooters. Perfect for shotguns, rifles, and pistols the Sightmark Mini Shot is able to withstand heavy recoil. The Mini Shot comes standard with a removable base and weaver-mount. Protected by a built-in sunshade hood, which shields the unit from harsh sunlight, the Sightmark Mini Shot Reflex Sight is also protected by Sightmark's Limited Lifetime Warranty.
