

SPECIFICATIONS

IR Power, mW	100
Diode type	LED
Lens diameter, mm	19
Range of Power, mW	0-70-100
IR Wavelength, nm	805
Battery	3 (2xAAA)
Range of Beam Divergence	8 to 14
Mount Type	Weaver
IP Standard	IPX4
Average operation time	20 hrs
Operating Temp.	-30 ... +40°C
Dimensions	145x32x39mm
Weight (without/with batteries)	100 / 120g

IR-850 Compact Infrared Illuminator

FEATURES

- Increased detection range
- Identify objects more accurately
- Obtain a more detailed image of the observed object
- Adjustable beam, spot to flood
- Adjustable power output

INCLUDED

- Carrying case
- 1" weaver mount
- Cleaning cloth
- User manual

Combined with any night vision riflescope or monocular, the **Sightmark Infrared Illuminator** acts as a flashlight during night vision use. With the Infrared Illuminator, the user can illuminate the target without the prey detecting it. The Sightmark IR Illuminator is great for indoor and outdoor use, where there is low ambient light, such as during a SWAT raid in a dark warehouse or varmint hunting out on a moonless night.
