The **Sightmark Triple Duty AT5R Tactical Red Laser Designator Kit** is an incredibly multifunctional laser sight featuring an intense, accurate red beam that is nearly flawless in its quickness of target acquisition. With a nighttime visibility of 2/3 miles and 70 yards in the daylight, the powerful Triple Duty AT5R is perfectly adaptable to any situation or time of day. An anti-tamper windage and elevation adjustment ensures the designator stays at zero despite heavy handling and/or recoil while the aircraft grade aluminum construction adds an extra level of protection and durability. The Sightmark Triple Duty AT5R Tactical Red Laser Designator Kit is also backed by Sightmark's exclusive Limited Lifetime Warranty.
