This innovatively designed crossbow is a perfect match for hunters, rifle shooters and beginners or professional crossbow users alike. The Risen XT is equipped with a unique, customizable AR platform with both picatinny and weaver rails, giving users the ability to mount flashlights, laser, sights and night vision riflescopes or any tactical accessory that can be applied to an AR platform. Along with a collapsible stock and an adjustable vertical fore-grip, shooters can modify the unit to fit their body and position. The Risen XT's ergonomic design offers exceptional power and durability with its compound levering system, split limb design, sturdy fore-grip and a 180lbs draw weight. Complete with a thick nylon padded sling, users can wear the crossbow across their back. Its quiet cams and 350 fps arrow speed make this crossbow quick and efficient.
