EFFICIENT™ BLACK BLADE

VALUE FOLDER

Designed from the ground up to be an affordably priced, performance-oriented folding knife, the Spyderco Efficient has earned a devoted following among savvy knife users who appreciate a solid value. To make this workhorse cutting tool even better suited to the needs of tactically oriented end users, Spyderco now offers it in an all-black configuration featuring a non-reflective black oxide blade coating and matching black liners and handle hardware. Its 8Cr13MoV stainless steel blade is full-flat ground for superior edge geometry and is available in both PlainEdge™ and partially serrated CombinationEdge™ configurations. An index-finger choil at the base of the blade allows a “choked-up” grip for enhanced control and Spyderco’s Trademark Round Hole™ provides swift, one-handed opening. The blade is paired with an ergonomic handle that includes full stainless steel liners, a sturdy LinerLock mechanism, textured G-10 scales, a lined lanyard hole, and a reversible hourglass clip that can be configured for left or right-side tip-up carry.
