Tangent Theta 3-15x50mm model TT315M  
Rifle Telescope is an intermediate-range precision sighting instrument for police and security marksmen. Designed as a reduced-weight professional marksman rifle telescope, the TT315M incorporates precise adjustment mechanisms with zero stops and mechanical revolution and windage direction indicators that virtually eliminate adjustment errors. The optical path has been optimized for unsurpassed image quality, allowing the marksman to see minute target detail and to remain in the aim for extended periods without eye fatigue.

Tangent Theta rifle telescopes are built in Canada and are specifically designed and function-tested for long lifecycles in the harshest of environmental conditions.

- 50mm objective lens
- 30mm main tube
- mechanical windage direction indicator
- eleven reticle illumination settings
- side parallax adjustment
- non-translating knobs with elevation zero-stop
- double-turn elevation with rev indicator
- 3-15x magnification range
- rapid diopter setting
