

# Trijicon®

## Suppressor/Optic Height Sights

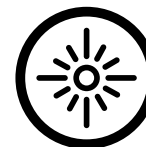

Trijicon® Suppressor/Optic Height Sights continue the low-light and no-light prowess of the original **Bright & Tough Night Sights**. With unique versatility for the ever evolving pistol landscape, Trijicon® Suppressor/Optic Height Sights are designed for pistols fitted with suppressors and also as a backup iron sight for pistol-mounted red dots.

**Co-Witness  
Compatible**

**Built  
Trijicon®  
Tough**

**No-Light/  
Low-Light  
Visibility**

### — The Science of Brilliant® —

At Trijicon, we are bound by a commitment to industry-leading research, design, and testing to seek innovative aiming solutions that constantly redefine “brilliant.” That’s why Trijicon products are subjected to the below testing methods.

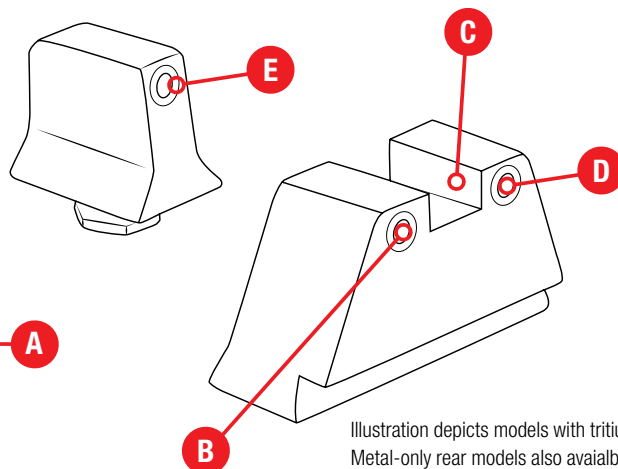

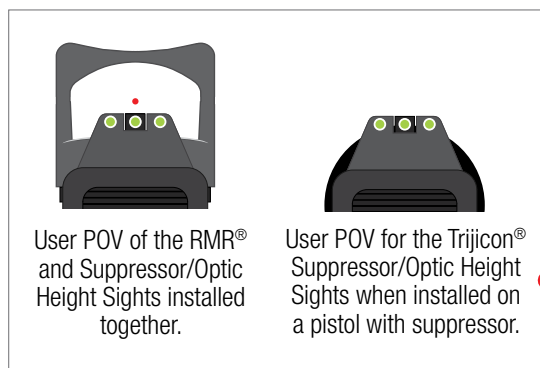

Alaska-to-Africa Tested | Solid Zero Tested  
Vibration Tested | Drop Tested

### — Suppressor or Red Dot, — This is the Solution for Your Pistol

- 1 Ready for Backup**
  - Works with pistol mounted red dots so you always have an aiming solution.
- 2 Instant Sight Picture in No-Light and Low-Light Situations**
  - Tritium phosphor-filled glass lamp provides battery-free illumination for a visible sight picture in all lighting situations.
- 3 Trijicon Durability**
  - Engineered and manufactured in Wixom, Michigan, applying decades of knowledge and experience devising battle-proven tritium and fiber optic aiming solutions.

# Features and Benefits

## A Increased Height To Accommodate Multiple Applications

Specifically engineered to be as robust as possible for use with a suppressor or as backup iron sights for a slide-mounted red dot sight.

## B Instant Sight Picture in No-Light and Low-Light Situations

Tritium illumination for a visible sight picture in any lighting condition.

## C Enhanced Protection from Heavy Recoil and Harsh Cleaning Solvents

Tritium gas lamps are contained within protective aluminum cylinders cushioned with silicone for maximum durability.

## D Evenly Distributed Light From Tritium Lamps

Each Trijicon® tritium lamp is capped with a sapphire jewel that helps evenly distribute the light and also acts as an additional layer of protection from puncture and cleaning solvents.

## E Front Sight Color Options

Trijicon Suppressor/Optic Height sights include a sapphire-capped green tritium vial and a variety of painted front outline color options.

# Color Options

## GLOCK® Color Combinations

Front Sight Color Options:  
HD Yellow - HD Orange - Black - White

Black Rear Sight Option

White Rear Sight Option

Metal Only Rear Sight Option

Front: Green Lamp  
Rear: Green Lamps

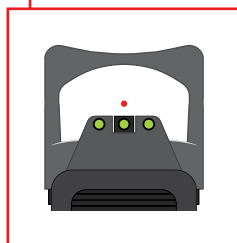

Front: Green Lamp  
Rear: Orange Lamps\*

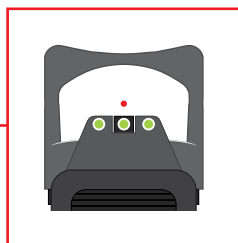

Front: Green Lamp  
Rear: Yellow Lamps\*

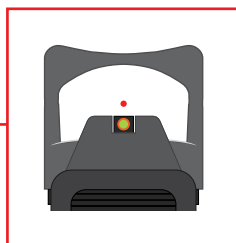

↑ \*Glock Only ↑

**Black front paint:** ideal for users looking for a backup iron sight solution that wants to keep focus on their red dot aiming point.

**White front paint:** ideal as a backup iron sight that gives users the extra edge in co-witnessing with their red dot and quick alignment.

**Yellow or Orange HD Paint:** For users that want a bright, fast front sight picture in any lighting condition.
