

CROSSFIRE® II

RED DOTS

ELEVATOR PITCH:

From close-range drills or steel at distance, the Crossfire® II is built to grow with you. Quick to set up. Simple to run. It's motion-activated, magnifier and night-vision compatible. Mount it up, and make some noise.

WHAT IS NEW TO THIS OPTIC?

The Crossfire® II 2 MOA red dots add more function without losing the simplicity that made the name popular. Features such as Solar with Auto D-TEC Technology, Motion Activation, and Button-Controlled Illumination are all new features found in the Crossfire® II red dot lineup.

WHAT ARE THE TOP USES FOR THIS PRODUCT?

Recreational Shooting.

IS THIS OPTIC NIGHT-VISION COMPATIBLE?

Yes, all the Crossfire® II 2 MOA red dots have 12 illumination settings, 10 daylight settings and 2 night-vision settings.

WILL BATTERY RUN TIME CHANGE BETWEEN THE RED DOT AND THE GREEN DOT MODELS?

No, on average with the Crossfire® II in constant on mode on brightness setting 6, the battery run time is 50,000 hours for both the red dot and green dot. With the use of the Solar with Auto D-TEC technology, the battery run time is extended up to 150,000 hours (solar models only).

HOW DOES SOLAR AUTO D-TEC TECHNOLOGY WORK?

The Solar with Auto D-TEC technology detects light conditions and automatically draws power from solar, or battery as needed.

WILL THE MOTION ACTIVATION WORK IF THE UNIT IS TURNED OFF?

No. This feature is only available when the Auto-Shutoff is turned on.

CAN THE MOTION ACTIVATION FEATURE BE TURNED OFF?

Yes. Powering down the red dot manually or holding the + and – button simultaneously for three seconds will disable the motion activation.
