VENOM®

RIFLESCOPES

OVERVIEW

Meant for weekend competitors and recreational shooters looking for accuracy on target no matter the range, Venom® delivers hardworking reliability and a solid selection of proven models for competition, long-range, and even self-defense.

WHY DID WE MAKE THESE RIFLESCOPES?

To provide a feature rich, affordable, and versatile riflescope line for the new, and budget conscious tactical shooter.

WHAT ARE THE TOP USES FOR THESE PRODUCTS?

The top use is recreational tactical shooting.

HOW DOES THIS UNIT COMPARE TO OTHER MODELS?

SKU	MAP	MAGNIFICATION X OBJECTIVE LENS DIAMETER	FOCAL PLANE	RETICLE	ILLUMI-NATION	EYE RELIEF	LINEAR FIELD OF VIEW (@ 100 YDS)	ZERO STOP	TURRET STYLE	TUBE SIZE	PARALLAX SETTING	LENGTH	WEIGHT

DBK-10025	4-12x40	1/4 MOA	12 MOA	70 MOA	70 MOA

WHAT IS THE BENEFIT OF FIRST FOCAL PLANE (FFP) VS SECOND FOCAL PLANE (SFP) RETICLE?

A second focal plane reticle is visually consistent in size and weight across the magnification range; however, the subtension values are only accurate on one magnification, typically the highest. In contrast, a first focal plane reticle will scale with magnification, and the subtensions used for ranging, holdovers, and wind corrections will be accurate at all magnifications.

WHAT IS THE EXPECTED BATTERY LIFE FOR THIS RIFLESCOPE?

The expected battery life at illumination setting 3 is 540 Hours on the Venom® 1-6x24. The Venom® 3-15x44 and 5-25x56 do not have illumination.

AM I ABLE TO USE THE RIFLESCOPE WITHOUT ILLUMINATION?

Yes, Venom® riflescopes feature a glass-etched reticle that can be used without illumination.

WHERE ARE THESE UNITS MADE?

China.
