

3X MAGNIFIER WITH FLIP MOUNT

PRODUCT OVERVIEW

The Wilcox 3X magnifier is designed to work in conjunction with our family of Fusion Fire Controls Systems. The Wilcox Fusion Reflex Sight is designed to quickly acquire a target in close quarter battle when engagement speed is essential. When the Wilcox 3X Magnifier is paired with Wilcox Modular Flip Mount, our magnifier product provides a fast and simple way to transition between a non-magnified setting again to engage target close in compared to a magnified sight picture engaging a target at a longer distance. The combination of the 3X Magnifier with our Fusion Fire Control System provides the operator a significant advantage identifying and engaging targets in a variety of combat situations.

The Wilcox 3X Magnifier is basic in design, durable and the dovetail base allows you to quickly attach and detach the 3X Magnifier when not needed. The Wilcox Modular Flip Mount positions the 3X Magnifier off axis when not required to minimize obstruction of the operator’s site plain and is designed not to move during weapon fire.

The Wilcox 3X Magnifier is light weight and optimizes the eye relief allowing the operator to quickly find the eye box. It is easily deployed utilizing our unique, very robust, force-to-overcome pivot mechanism. The 3X Magnifier is made of premium grade optics and housed in a lightweight compact design.

FEATURES & BENEFITS

- The Wilcox 3X Magnifier is designed to work in conjunction with our family of Fusion Fire Control Systems and the BOSS-Xe
- The combination of the 3X Magnifier with our [Fusion Fire Control Systems](#) and [BOSS Xe](#) provides the operator a significant advantage in identifying and engaging targets in a variety of combat situations and ranges
